

## Dr. Oliver Garden

### **Dean and Kenneth F. Burns Endowed Chair in Veterinary Medicine**

LSU School of Veterinary Medicine  
Louisiana State University

My research focuses on mechanisms of peripheral tolerance in health and disease, spanning the mouse, rat and dog as model species of both autoimmune disease and cancer. My work has interrogated the role of regulatory T cells and more recently myeloid-derived suppressor cells in this context.

### **Education**

PhD, Royal Veterinary College (London), 1998  
BVetMed, Royal Veterinary College (London), 1993  
BSc, King's College London, 1990  
CASLAT, Imperial College London

### **Certifications and Licenses**

Diplomate, American College of Veterinary Internal Medicine  
Diplomate, European College of Veterinary Internal Medicine-Companion Animals  
Fellow, Royal College of Veterinary Surgeons (UK)  
Fellow, Higher Education Academy (UK)  
Member, Royal College of Veterinary Surgeons (UK)  
Fellow, Royal Society for the Encouragement of Arts, Manufactures and Commerce (UK)  
Fellow, The College of Physicians of Philadelphia
